CONVERT AT BIRTH AND DURING EVERY CHALLENGE

Give 15 cc at birth and with electrolyte or antibiotic treatments.

"During a bitter cold spell at calving, we moved cows into pens with some shelter. Since close quarters often bring health challenges, we gave every calf 15 cc CONVERT. Those were some of the stoutest calves on summer grass."

Matt Perrier, Dalebanks Angus
Eureka, KS

"CONVERT is the single best investment we make every day on our farm for bull calves, beef calves, and heifers. No calf goes without it. In today's market, it's worth its weight in gold."

Jeremy Kinslow, Kinslow Dairy
Smiths Grove, KY

"We've used CONVERT for years. We give it to every calf that's born. It's a great product and we've had great success with it. We definitely recommend it!"

Mark Wilburn
Asheboro, NC
