

Guide to important scour-related challenges

Pathogens in blue are covered by CONVERT™

Age of Calf	Probable Pathogen	Pathogen Type
1-5 days	<i>E. coli</i>	Bacterial
7-9 days	Rota & Corona Virus	Viral
10+ cool days	<i>Salmonella typhimurium</i>	Bacterial
10+ hot days	<i>Salmonella dublin</i>	Bacterial
10+ days	<i>Cryptosporidium</i>	Protozoal
10+ days	<i>Clostridium perfringens A & C</i>	Bacterial
4+ weeks	Coccidia	Protozoal

This chart is an approximation and is not intended to diagnose any disease. The use of fecal cultures and laboratory analyses is the best way to isolate the organism responsible for the on-farm challenge.
