

SELECT BIOCYCLE[®] SHOWCASE

*Experience
the Difference*

Digestive support designed for growth, bloom, and show-ring performance.

Features proprietary beneficial bacteria, live cell yeast, yeast culture, and a broad-spectrum enzyme package to support:

- ▶ Faster growth and bloom
- ▶ Improved feed efficiency and nutrient utilization
- ▶ A healthy, stable gut microbiome
- ▶ Consistent feed intake during stress
- ▶ Hair coat quality and overall appearance

BioCycle Showcase gives your animals the show ring advantage.

↑ Helps keep animals eating during travel and feed changes

↑ Improves hair quality and growth

Lusich Electric Strike P, nominated All-American Milking Yearling

"We've been feeding BioCycle Showcase for about a year and we're impressed with the results. We're feeding less per head per day than the product we used previously, which has lowered our cost per day. At the same time, we're seeing thicker, healthier hair, better hair regrowth after health challenges, and cattle that seem to recover quicker. We feed it to every animal from weaning through the milking herd because it's simple, consistent, and I believe the added beneficial bacteria are helping keep our animals healthier."

MITCHELL SCHLEICHER
LUSCH Poultry and Milking Shorthorns,
Brooklyn, Wisconsin

Acacia PB Cinnamon (Powerball), 1st Milking Yearling, Southeastern National Brown Swiss Show

"Before feeding BioCycle Showcase, we'd sometimes have animals go off feed at shows. Since we started using it, that's no longer an issue. We've also noticed better growth in our younger calves, which makes it an easy product to keep in the feeding program."

RICK ELLERBROCK
Acacia Swiss, West Salem, Ohio
